Dear Mr. Silverstein & Ms. Hubler:

At ThyssenKrupp there is nothing more important than the safety of our customers and employees. ThyssenKrupp Access Corporation has advised the Consumer Product Safety Commission (CPSC) that proper installation of residential elevators is a critical, industry-wide safety issue. While ThyssenKrupp Access Corporation no longer produces residential elevators, ThyssenKrupp is actively working with others in the elevator industry to review and update applicable installation standards through the third party standards group, the American Society of Mechanical Engineers (ASME). We support targeted outreach efforts so that users and professional installers can verify that residential elevators have been properly installed.

Should you have any questions or comments, please feel free to contact me at (404) 348-8571.

Sincerely,

James R. Doyle for
